

About Us

We are MiTek Mezzanine Systems – the first global mezzanine company. In 2020 three mezzanine companies owned by MiTek, Cubic Designs based in North America, Mezzanine Europe based in Germany and Mezzanine International based in the UK have joined forces to offer our clients the benefits of a global partnership with local solutions. Together we resolve larger challenges in the material handling and logistics industries. We are driven by our customers' success.

MiTek® – part of Berkshire Hathaway – is a leading global supplier of engineered products, software and systems to the construction industry.

What we do

Speed you need

MiTek Mezzanine Systems specialises in the design, manufacture and installation of integrated, future proofed mezzanine flooring systems across North America and Europe. Our mezzanine flooring products are specifically designed to fully integrate with all industrial and commercial environments and applications, ensuring the best possible service for your commercial and technical requirements.

By investing heavily in Research & Development we have launched our very own steel mezzanine systems: our patented Mezzanine7® solution and MezzHead® add-on brackets. These systems are a turnkey solution for flexibility, strength and ease of installation. Our Mezzanine Standard offers a lightweight construction and fast installation.

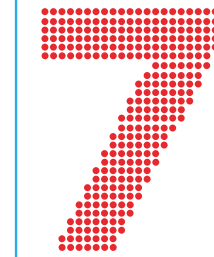

As the first global mezzanine company we are in a unique position to offer our customers the benefits of greater capacity to handle very large projects, economies of scale, enhanced access to the latest technologies through shared investment in R&D, and a wider and more unified service network.

"Uniformly distributed load capacity is 7 times stronger"
Steel Construction Institute

Future-Proofed

A minimum point load capacity of 2000 kg

Achieves 75% less deflection

A full structural warranty is given for 10 years

Class "0" fire propagation

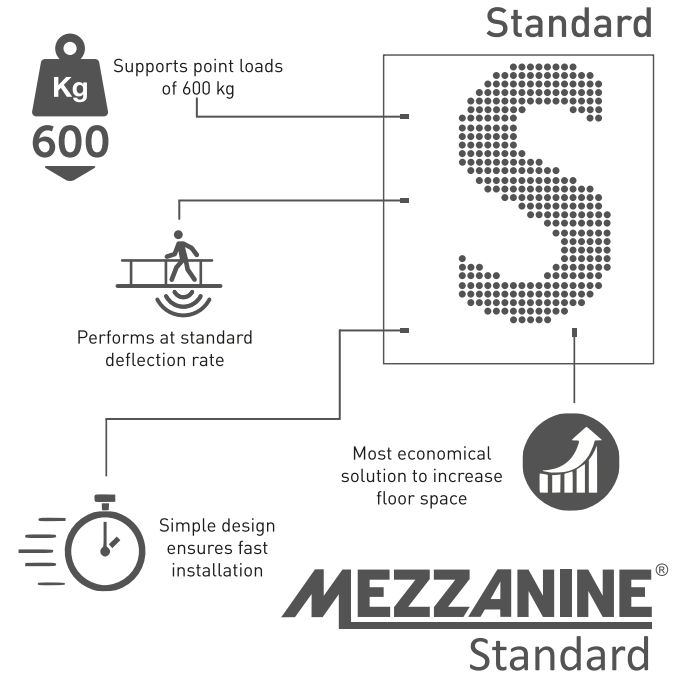

Increased light reflectivity

Projects

Driven by your success

“ One of the challenges we faced with this project was to install a mezzanine structure that would allow for future changes, especially to the racking positions. We were impressed by the Mezzanine7 solution as its increase in point load capacity provided our client the flexibility required. ”

Jaap Vos, Managing Director UK
SSI Schaefer

“ A special thank you to your team for their commitment and flexibility to fulfill this project. It is always a pleasure to work with experienced and trustworthy people. ”

Andreas Weller, Site Manager
Dematic (Prague)
