

The background of the entire advertisement is a photograph of a large industrial building's interior. It features a complex network of dark grey steel beams and supports. A mezzanine level is visible, with its structure made of lighter-colored steel joists. The floor is a light-colored, polished concrete. The lighting is bright and even, highlighting the industrial architecture.

MiTek®

MEZZANINE SYSTEMS

BUILDING
PRODUCTIVITY

Steel platforms
from the experts

Mezzanine expertise you can rely on

Are you looking for a mezzanine system that fits seamlessly into your existing building? Are you planning a new commercial building where you want to ensure the best possible use of available space? Or are you seeking total freedom in the design of your mezzanine levels with the reassurance that, if required, they can support the heavy and dynamic loads generated by automation and robotic technologies? If so, MiTek is the right partner for you!

MiTek is a global specialist in the design and realisation of future-proof steel mezzanine solutions. Our mezzanine floors are characterised by absolute stability and the highest possible flexibility, along with simple and fast installation. Customers in Europe and beyond appreciate the quality and customisability of our systems – features that we guarantee and that we are constantly enhancing through our research & development.

Your advantages with MiTek:

- Professional advice
- Specialist for large-scale projects
- Expertise in the integration of automated systems
- Knowledge of country-specific conditions
- Comprehensive project management
- In-house engineering
- CAD software and skills
- Possibility to test components
- Excellent quality and safety standards

Early advice pays off.

Secure competitive advantage with our mezzanine systems

Create space and increase productivity

Investing in a mezzanine secures immense benefits. As well as creating usable space, mezzanine floors bring access and integration possibilities for various elements within your material flow. Steel constructions provide a much faster and more cost-effective solution for gaining space than significantly altering the basic structure of a building or relocating the business.

The benefits of mezzanines at a glance

Steel platforms:

- create space faster and at a lower cost than building modifications
- avoid the cost and disruption of moving premises
- eliminate the need for leased space
- optimise the payback on an existing building by utilising more of its volume
- can be easily expanded, relocated or dismantled
- enhance efficiency and quality through space creation and improved workflow
- achieve flexible integration with other machinery or systems
- can be integrated flexibly and quickly into existing facilities and systems
- benefit from tax depreciation in some cases

/// A special thank you to your team who carried out our project with great commitment and flexibility. It is always a pleasure to work with experienced and trustworthy partners. ///

Andreas Weller, Site Manager, **Dematic**

Your specialist for large and integrated projects

Although mezzanine floors appear to be simple constructions, their planning and installation is becoming increasingly complex. Automation, digitalisation and robotics bring special requirements in terms of mezzanine construction in both the production and distribution sectors.

MiTek is your experienced partner when it comes to the realisation of large-scale projects and the integration of automation technologies. We bring extensive know-how and the capacity you need for complex and high-performance installations, including detailed knowledge of country-specific building regulations.

Our White Paper entitled 'Expert insight into planning a large or integrated mezzanine floor solution' is available as a free download at www.mitek-mezzanine.com.

/// It was very important that MiTek had integration experience, as the customer needed products to be moved swiftly and efficiently between mezzanine levels. ///

Steve Hicks, Managing Director Contract Logistics, **Noatum**

Flexible solutions that are fit for the future

INVESTING IN A
FORWARD-THINKING
SOLUTION WILL SAVE
YOU MONEY IN THE
LONG RUN.

We are your ideal partner for seamless integration of your mezzanine solution into your operating environment. We offer a choice of proven products:

Mezzanine7®

Mezzanine7 is MiTek's patented steel platform solution with up to 7 times the load capacity of a standard steel platform. Mezzanine7 is the future-proof and flexible choice, with the option of retrofitting.

- Point load capacity of up to 5000 kg
- Heavy-duty construction
- Fully compatible with automation and robotics
- 75% less deflection than a standard mezzanine
- Low vibration
- Increased light reflectivity
- Class '0' surface spread of flame

Standard Mezzanine

Our proven standard steel mezzanine is a versatile product that meets high load requirements. It is a particularly economical and fast solution to implement.

- Point load capacity of up to 600 kg
- Lightweight construction
- Partially compatible with automated and robotic technologies
- Normal deflection levels

“ One of the challenges we faced with this project was to install a mezzanine structure that would allow for future changes, especially to the racking positions. We were impressed by the Mezzanine7 solution, as its higher point load capacity provided our client with the required flexibility. ”

Jaap Vos, Managing Director, **SSI Schäfer**

Who we are

MiTek®, part of Berkshire Hathaway, is a global company focused on transforming the construction industry through creative solutions that meet the demand for smarter, more affordable and more sustainable buildings. We provide engineered products, integrated software, services and automated solutions for the building industry worldwide. Innovating and expanding into aspects of global building, MiTek empowers customers to improve the way they design, make and build.

Based in Europe and North America, our team of dedicated mezzanine specialists collaborate to design, manufacture and install innovative and future-proofed steel mezzanine systems for commercial and industrial applications. Our solutions secure competitive advantage by optimising space utilisation and boosting productivity. Customers include warehouse developers, general contractors, system integrators and end users in Europe and worldwide. With over 35 years' experience from more than 10,000 mezzanine projects, MiTek is your experienced partner when it comes to the integration of automated technologies and the realisation of large or complex mezzanine projects.
