# MiTek

### **MEZZANINE SYSTEMS**

## **GENERAL STAIRCASES**

According to the latest building regulations, most new mezzanine floors require to have at least one general access staircase intended as the main route between different levels. MiTek offers various general access type solutions, all of which comply with the latest building regulations requirements. Many of our solutions can be used on staircases and floors to offer an overall consistent styling and adaptable for both top and side mounting. Our engineers are here to advise you on the best solutions for your build.

#### **OVERALL SPECIFICATIONS**

- → 1200mm wide with a maximum rise of 170mm and 250mm going. Handrails to include a 250mm run off top and bottom.
- → Height of handrail centreline above floor level is 1100mm
- $\rightarrow$  Height of knee rail centreline above floor level is 600mm
