MEZZANINE SOLUTIONS FOR END-USER CLIENTS

FUTURE-PROOF SOLUTIONS FROM THE MEZZANINE EXPERTS

Having designed and delivered mezzanines for over 35 years, MiTek offers a comprehensive service. With unrivalled technical expertise and project management skills, we can help you achieve a high-quality yet affordable solution.

FUTURE-PROOF DESIGNS

We are committed to understanding your business in order to provide you with a mezzanine solution that meets both your current needs and future growth.

EXPERTISE & EXPERIENCE

Our vast experience – gained through over 10,000 installations worldwide – results in rapid but realistic project timelines, supported by an agile supply chain and reliable contractors.

PIONEERING INNOVATION

Shared investment in R&D across our global footprint means you benefit from solutions that are cutting-edge yet cost-effective. See our products at your local Innovation Hub.

FASTER COMPLETION

Intelligent design and efficient project management result in faster installation and earlier handover, enabling you to profit from your investment sooner.

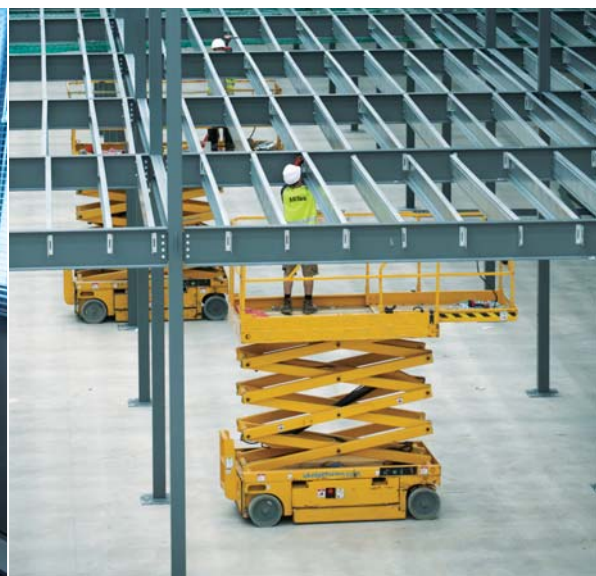

SECURE INVESTMENT

Not only are our mezzanines faster to install than concrete floors, they can be extended, adapted or relocated if necessary, giving flexibility for the future.

REDUCED RISK

Full compliance in terms of design, installation and safety to both UK and European regulations means lower risk of delays and additional costs.

CASE STUDY

BUSINESS CAMPUS WITH MULTI-TIER MEZZANINE

British e-commerce company – Manchester, UK

CHALLENGE

Creation of a future-proofed, multi-tier mezzanine floor solution with options for business expansion. The mezzanine design needed to be flexible so that it was capable of accommodating various usage requirements.

SOLUTION

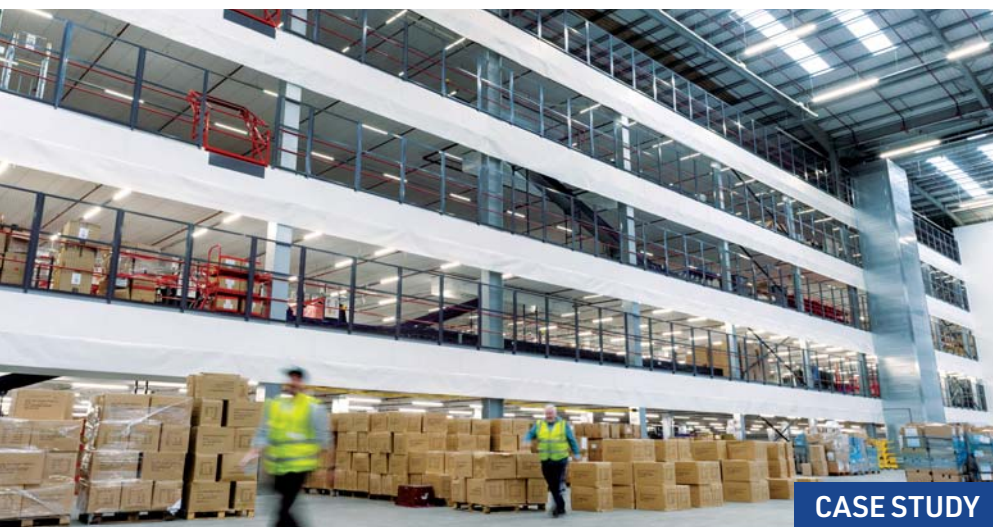

We provided design engineering expertise and product knowledge to guide the client's decision process and installed a 2-level system that could be extended to a third level in order to meet future business ambitions.

SPECIFICATION

Mezzanine area:
21,558 sq m (232,048 sq ft)

Number of levels:
3

CASE STUDY

FOUR-TIER MEZZANINE WITHIN FULFILMENT CENTRE

Supply chain management firm – Rochester, UK

CHALLENGE

To develop mezzanine options quickly in order to finalize building plans for the new fulfilment centre. The aim was to build a cost-effective mezzanine system that would meet the client's current and future requirements.

SOLUTION

Visiting our Innovation Hub and an existing customer site to evaluate different mezzanine options helped the client to make design decisions early in the project, thereby securing substantial time and cost savings.

SPECIFICATION

Mezzanine area:
25,548 sq m (275,000 sq ft)

Number of levels:
4

OUR COMMITMENT TO END-USER CLIENTS

Keith Aldrich explains why companies of all sizes trust MiTek as their mezzanine partner.

Getting an experienced mezzanine company involved early in the life of your project means you can tap into their expertise in order to achieve the optimum solution for your business.

Unrivalled experience

Of course, the more experienced your mezzanine supplier, the greater the scope for advice that can save you time and money. MiTek has designed and delivered more than 10,000 mezzanine installations worldwide in over 35 years. Although we work with major brands – such as Amazon, ASDA, DHL, H&M, Lidl, Mercedes, Tesco and Toyota – all clients benefit from our experience. In addition to having a depth of expertise in diverse market sectors, we can help with building regulations approval to provide a truly comprehensive service.

Future-proof solutions

Making our mezzanine systems future-proof is a core part of our process. To offer a solution that is not only suitable now but also in the future, we take the time to understand your business and its growth trajectory. Of course, our steel solutions can be relocated – so, if you lease your building, you can hand it back in line with pre-lease conditions. Early collaboration with MiTek enhances the opportunities to influence the design and construction of any new buildings in ways that may save money, as well as helping to future-proof your mezzanine solution.

Superior quality

Exceptional strength and stability ensure minimal deflection for our mezzanines. With CE marking for our products and ISO 9001 certification for our company, you can rest assured that we are committed to ensuring the highest quality standards at every stage.

Rapid delivery

We have a reputation for fast project delivery. Not being tied to any one manufacturer but instead partnering with approved suppliers worldwide means we can ensure a rapid response, while also minimizing our carbon footprint. By dovetailing our installation schedules with those of other contractors, we achieve an earlier completion date, allowing you to profit from your investment sooner.

Global gains

We are part of Berkshire Hathaway, an organisation focused on transforming the construction industry through creative, smart and sustainable solutions. As the first global mezzanine company, MiTek has access to the very latest technologies through shared R&D and can leverage economies of scale to provide great value for customers. Our global footprint also allows us to provide a wider, more unified service network.

Keith Aldrich
Procurement &
Contracts Director

TO OFFER A SOLUTION THAT IS NOT ONLY SUITABLE NOW BUT ALSO IN THE FUTURE, WE TAKE THE TIME TO UNDERSTAND YOUR BUSINESS AND ITS GROWTH TRAJECTORY.
